- With its large networking database, SWRIInstitute can help you **DESIGN, APPLY**, for and ultimately, **SEAL** the job you want.

SWR FOUNDATION STUDENT EDUCATION SCHOLARSHIP

The SWR Foundation was established in 1999 by the Board of Directors of the Sealant, Waterproofing & Restoration Institute (SWRIInstitute). Recognizing a need to prepare students entering the sealant, waterproofing and restoration industry, the SWRIInstitute mission states: Through education and fellowship SWRIInstitute will elevate the standard of practice for the sealant, waterproofing and restoration construction industry.

SWRIInstitute is a trade association consisting of contractors, manufacturers and design professionals involved in the sealant, waterproofing and restoration construction industry. One of SWRIInstitute's strategic goals is to serve as a resource for improving the knowledge and professionalism of the industry through the exchange of ideas and education. The SWR Foundation is supported by voluntary participation through member donations and a yearly golf tournament fund raiser.

SWR FOUNDATION STUDENT EDUCATION SCHOLARSHIP SELECTION CRITERIA

Completed applications must be returned to SWRIInstitute headquarters along with copies of the applicant's academic transcripts and letters of recommendation. Prospects will be reviewed on a rolling applications process, in order of date received. Those interested are encouraged to submit applications in early August to be eligible for the fall semester award and in early January to be considered for the spring semester award. However, late applications will still be reviewed for scholarships awarded during the following semester.

The SWRIInstitute board of directors and a scholarship selection committee will determine the selection of scholarship recipients. Applicants will be judged by the following criteria:

- Indication of interest in pursuing a career in the construction industry, more specifically, the sealant, waterproofing and restoration industry.
- Record of scholastic achievement, including grade point average.
- Financial need.
- Letter of reference from instructor or department dean, describing applicant's interest in the construction industry.
- Letters of recommendations by instructors, employers or other pertinent individuals.

THE SCHOLARSHIP

The SWRIInstitute board of directors and a selection committee determine the number and dollar amount of scholarships awarded, with a maximum dollar amount of \$1,500. The purpose of these scholarships is to assist and encourage qualified students to further or continue their interest in the construction industry, specifically the sealant, waterproofing, and restoration industry, as a future or continued career.

NOTIFICATION

All applicants will be notified, in writing, as to the determination of scholarship recipients. After the recipient's registration has been confirmed at the institution indicated on the application, a check will then be issued in the name of student and mailed directly to the registrar's office or financial aid office.

Fall semester scholarship recipients are announced in conjunction with the SWRIInstitute Fall Technical Meeting, while spring semester scholarship recipients are announced at the SWRIInstitute Winter Technical Meeting. For more information about the dates of these meetings, please visit the SWRIInstitute website.
